

# LIVING WALLS

## Vertical Landscaping

Our living walls are a contemporary, space saving way to add live planting to your office environment, covering a small or large area in lush greenery. Plant Designs can provide built-in and free-standing units that will create large areas of vertical planting.

We are partnering with Natures Green from The Netherlands, a leading supplier throughout Europe and the US. With our extensive horticulture knowledge supported by their expertise, we're confident we can help you find the ideal way to introduce vertical planting. We will develop the best design using the correct planting solution for your space. Always combined with our expert ongoing maintenance to ensure it continues to look good.

## Living Panels

A living panel can be easily installed in any space and come in a large range of sizes. Perfect for larger and smaller rooms, adding masses of greenery without the need for floor space.

Our walls are planted with mature plants which offers immediate impact and a full, lush wall from day one. Our expert horticulturalists will keep your wall looking its best with expert ongoing maintenance.

## Moss Walls

A moss wall is a fantastic and different way to add lots of greenery to your space. Using real preserved moss we can add a low maintenance green wall that will last.

Expertly installed by our team and available in bespoke sizes to cover an entire wall with beautiful mossy texture or in frames to add an interesting feature.

## Living Dividers

Living dividers are free-standing units, perfect for creating screening in open plan spaces. They can add privacy and absorb surrounding noise, allowing space for meetings or quiet concentration. They require no power therefore they can be placed anywhere in your working environment. Quickly installed and well maintained by our horticultural team.

## Exterior Walls

Living walls are also a great addition for your exterior spaces. As with our interior walls they can be made in a large variety of sizes. Create your own outdoor green space or herb garden.

## Why Choose Our Living Walls?

- Add planting without taking up floor space
- Create screens and reduce noise levels
- Available in bespoke sizes
- No need for expensive plumbing systems
- Easily and quickly installed
- Professionally maintained
- Live plants clean the air and add oxygen
- Pay monthly for rental and maintenance
